

# Non-Contact Temperature Indicator Camera

- Fast and efficient non-contact infrared body temperature detection
- Temperature measurement range = 86°-113 F° (30°-45° C) Accuracy  $\pm 0.5$
- Automatically registers and records information to avoid manual operation
- Identifies unmasked personnel and provides real-time high temperature warning
- Face recognition algorithm accurately recognizes faces in <500ms
- 4.85" x 10.50" x 1.80" W x H x D (123.5mm x 266mm x 45.5mm)
